

CONTROL PRO®

Get to know our tool.
Control Pro®

Control Pro

EXPERTS IN EMPLOYMENT LAW COMPLIANCE

Control Pro is a platform, which allows a monthly revision of all documentation referring to contractors' employees that render services or collaborate in our Clients activity. Our tool allows to verify the level of compliance of minimum wages, labor benefits, social security and work insurance policy payments for all personnel involved.

Control Pro is appropriate for the testing of compliance in every area of activity. Enabling Clients to minimize labor and social security risk, avoiding conflicts reaching high compliance standards.

¿HOW DOES CONTROL PRO WORK?

It's a monitoring tool, with technological support and professional human supervision. This guarantees a qualified and precise method, as well as friendly usage that only the leading professionals in the area can offer.

Control Pro allows for online, real - time access to compliance levels for each contractor. Documentation is also provided monthly via web.

This tool facilitates Client's access to all contractors' information as well as the diagnosis done by our expert professional team.

The information is monitored throughout the process by our team, which keeps the tool updated according to the local legislation. Our diverse Clients find in this service, which is unique in the market, the true solution they need for reducing risks when hiring outsourced services provided by third parties.

OUR NATIONAL AND INTERNATIONAL CLIENTS

Our clients are major national and international companies, from diverse industries and trades.

We provide an efficient and reliable service thanks to a personalised and dynamic relationship between clients and our professional team.

Our firm is fully aware of the needs of companies and executives and therefore provides a unique interdisciplinary view of every matter. Our staff is passionate and dedicated to law practice, with a strong commitment to work and professional law ethics.

Well known for our special skills in construction and assembly projects.
